

I am trucker..I depend on this service to help me navigate the hwy's and streets of America.

To depend upon local radio stations that may not broadcast in an area that truckers may be in is not good for any trucker.

As you may or may not know, we do end up in many out of the way places where local broadcast signals do not reach.

With the advent of XM Radio and the instant traffic and weather service it is a boon to the trucking industry. It serves to keep the hwy's safer and drivers more informed, whether they be truckers or car drivers.

Please do not support the NAB's petition 04-160!!!
